DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 12-15, drawn to a system for arranging airline flight reservations and the transportation of baggage for airline passengers, classified in class 705, subclass 6.
 - II. Claims 10 and 11, drawn to a method for constructing a flight itinerary for bid by airlines, classified in class 705, subclass 37.
 - III. Claim 16, drawn to an apparatus for tracking luggage, classified in class 365, subclass 192.

The inventions are distinct, each from the other because of the following reasons:

1. Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as arranging airline reservations for a passenger and the transportation of the baggage for airline passengers. Invention II has separate utility such as allowing a customer to create a preferred itinerary to be bid on by multiple airline services. Invention III has separate utility such as using an electronic chip to track airline passenger luggage. See MPEP § 806.05(d).

Art Unit: 3639

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
